

# Assa Card Lock

### Performance

Assa Card Lock is a mechanical card lock for cupboards. Hole punched cards will give access to lock with keys. The lock can be made to accept one hole punched or two hole punched cards.

On request, when assembling the lock for one hole punched cards, 4 different located card codes are available and for two hole punched cards, 20 different card codes are available.

The card lock can be ordered for right-or lefthanded lockers. A range of cylinders covering different demands of material thickness and security levels, can be used. The cylinder is master keyed.

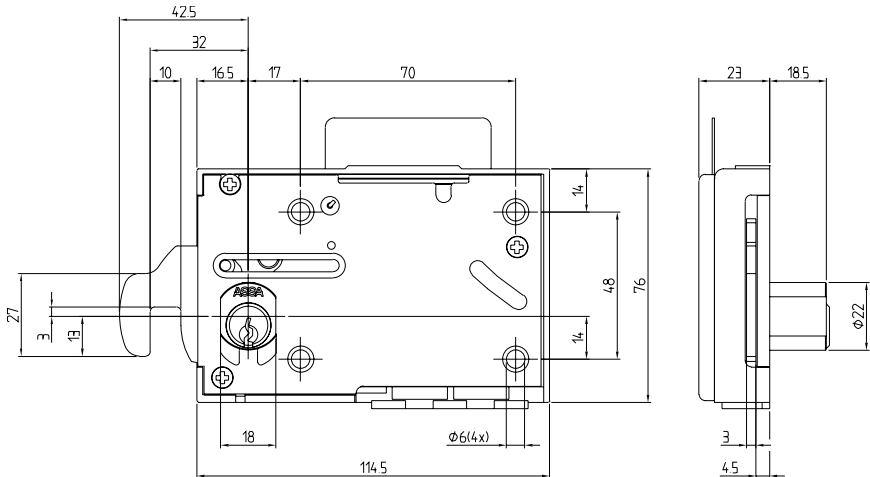

The lock is made for use in wet areas: Lock case of polycarbonate, cylinder of chromated brass, keys and hook bolt of nickel plated brass. Desmo keys of nickel silver.

### Function

When inserting the card in the lock, the door can be locked and the key removed. In locked position the card remains captive. The insertion of a card is then the deposit, which enables the key to be taken away by the customer. After use, when the door is unlocked the card can be removed and the key remains captive in the lock, available for next customer.

Using different card codes, enable to keep customers apart in different spaces. (For instance, in order to keep men in mens room and women in ladys room).
