NETWORK MANAGEMENT

Versa™

**Designed with
Flexibility in Mind**

With shared and assigned use capabilities, Versa RFID locks enable storage options that easily adapt to the ever-changing needs of your team—our most versatile lock, Versa provides enhanced, simplified security to any storage solution.

Digilock®

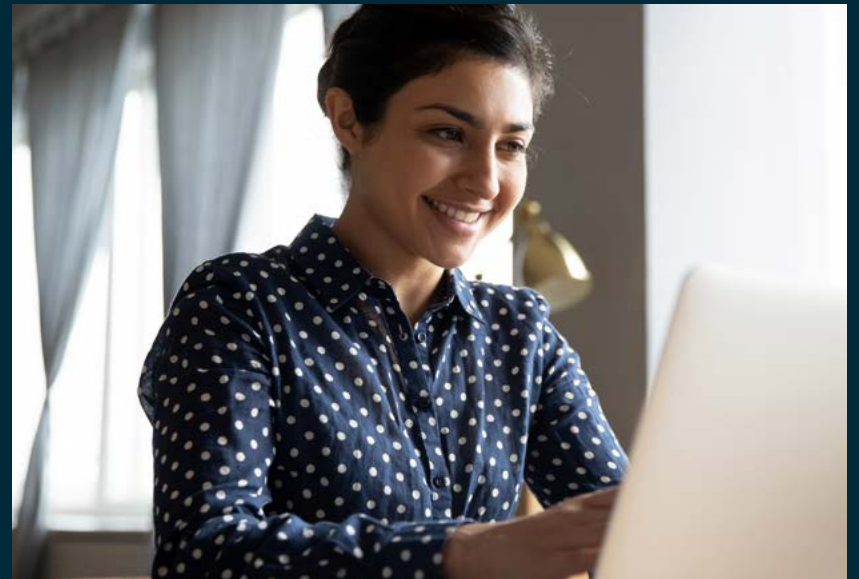

A Seamless Integration

Versa electronic lock solutions seamlessly integrate into your workspace while providing enhanced security and protection.

Operate your system with a touch-free RFID credential or a convenient Mobile ID.

With functionality at its core, Versa RFID is perfect for streamlining your workflow in any environment.

Engineered for Anywhere

From inspiration to installation, we partner with our customers in many industries to ensure that their facilities offer the latest in personal security solutions, providing convenience and peace of mind.

- Workplace
- Hospitality
- Manufacturing
- Healthcare
- Retail
- Government

Combining quality construction with state-of-the-art security, Versa is perfect for the most demanding environments. Easily managed and simple to use, our lock solutions modernize any space with improved flexibility and collaboration.

All Versa models are available in both surface and recess mounts.

FUNCTIONALITY

Choose the Use Case That's Right for You.

SHARED USE

A simple day-use solution, shared-use functionality lets the User select any available storage space and present a valid RFID credential or Mobile ID to lock and the same RFID credential or Mobile ID to unlock a Versa unit. When the current user is done and the storage space is vacated, Versa is ready for the next user and RFID credential or Mobile ID.

OR

ASSIGNED USE

If you need to assign storage for a longer period of time, assigned use lets Management program single or multiple credentials or Mobile IDs to the lock for the User or Users. Each user presents the assigned credential or assigned Mobile ID to unlock a Versa unit. To lock, the user closes the door and then turns the knob back to the locked position. The slam cam option automatically relocks when the door is closed.
