

LOWE & FLETCHER

LOCKING SYSTEMS FOR INDUSTRY

DUAL POUND COINLOCK

The new UK £1 coin will enter circulation in March 2017 with The Royal Mint producing more than 1.4 billion units. This will render existing devices which operate with the traditional £1 coin obsolete including all £1 Coinlocks.

Lowe & Fletcher are delighted to launch a new range of "Dual Pound" Coinlocks which accept both new and old coins without further modification. These are available with hook bolts, sliding bolts, wet area, dry area, left and right orientation with 10 disc, 8 disc and high security in-line pin tumbler cylinders.

Manufactured in the UK to exacting standards, the locks are used in many locations including gyms and fitness centres, spas and swimming pools.

- Strong
- Reliable
- Convenient
- Simple to install
