SPECIALIST STORAGE

Laptop security and management

- *Choice of 5, 10 & 15 compartments*
- *Vandal and thief proof*
- *Anti-theft 'SafeSecure®' locking device*
- *In locker charging options*
- *Standard cam lock + other options*

The beauty of the new highly secure and durable SafeCharge locker is that it contains optional charging equipment. So while your laptop, mobile phone, camera, power tool, or mobile communication equipment is tucked away safely, it can also be recharged.

Each laptop is concealed within its own safe space – and this takes a would-be burglar much longer to access all the laptops; most other products provide just one door for access to all – which is convenient but not so secure. And the locker looks.....just like a locker, so does not appear special or valuable to the would-be casual thief. The neat, stylish heavy duty 2mm thick metal lockers are available with a choice of five, ten or fifteen individual compartments.

The lockers come with high quality cam or hasp lock; while other options include coin locks and electronic swipe card, RFID tag or finger print ID which can integrate with facilities management.

All lockers can be supplied with AC/DC charging options: each compartment can be provided with a 3-pin mains voltage socket to enable the charging of portable devices.

If you can see that the unique qualities of this innovative locker will stop your security headaches or provide less 'down time' lost to recharging, then please ask us to tell you more.

Dimensions (mm) 450(w) x 500(d) x 1800(h) for 10 and 15 compartment lockers, 5 compartment 450(w) x 500(d) x 900(h).

TOTAL LOCKER SERVICE

MiniMinder- The Great Little Locker

- 5, 10, 12, 15, 20, 30, 40 compartments
- Charging options for phones and PDAs
- Can generate a source of income
- Key lock / padlock are standard
- More Locking options:
coin locks, 4 digit combination locks, magnetic stripe card or RFID tag which can be integrated into whole facilities management systems

The MiniMinder stores and re-charges.

The MiniMinder is the answer for safe keeping and re-charging of phones, PDAs, and iPods etc. Police forces, schools, colleges, hotels, call centres, gyms, hospitality suites, nurseries, and doctors' surgeries etc are purchasing these for security and convenience. The MiniMinder provides accessible, secure space to keep small devices, and offers a charging option so that the equipment is always ready for work.

The Charging Option: The MiniMinder has been specifically designed for re-charging small personal appliances such as phones, iPods, PDAs, bar scanners etc and is increasingly purchased by the emergency services, colleges and hot desk offices. Each compartment is fitted with a 3-pin socket to allow use of the appliance's own charger to be used in a secure storage environment. This way the appliance can be re-charged while locked away and is ready for use when removed from the locker – great convenience!

POSTAL LOCKERS

Ideal postal distributor

SWIMMING AND SPORTS LOCKERS

System 2000: good looks can be achieved within a budget, without sacrificing strength and security.

- Frame and body assembly: unique extruded door frame uprights are formed from heavy gauge aluminium. Rounded profile allows easy bag deposit and removal. Doors are SGL.
- Curved single piece body shell is hygienic and user-friendly with no sharp edges or dirt trap corners
- Mouldings: high quality polypropylene top, shelf, and base have lattice structure for maximum strength and security.
- Hinges: strong, heavy-duty, full-length hinge assembly built into locker frame provides a high level of security. Plastic shrouding maintains tidy appearance while automatic door closure reduces risk of injuries
- Half-height unit available, ideal to meet DDA requirements

System 2200: Inset doors fitted in to a high specification aluminium doorframe giving a very high level of strength and security.

WHAT THEY SAID.....

Iain Abercrombie,

Head of Faculty Management, Business and Sport North Glasgow College said... 'Having gone through a process of tendering for contracts and planning installation in a new build, where specification and layout of the changing areas and lockers changed significantly over the course of a few weeks, North Glasgow College found Total Locker Service both flexible in terms of their reaction to changes and also in terms of keeping the costs to the tender price even with changes. The facility now benefits from a very professional, quality finish from a very professional, quality company.'

Chris Sandford, Mobile Data Project Manager

Cleveland Police was pleased to comment "We needed a solution that would allow our officers the ability to charge their PDA devices in a secure environment. After looking at a number of solutions we decided on using the MiniMinder lockers. They have proved very effective in keeping the devices charged and therefore permanently online; exactly what was required."

AND.....

Grant Donaldson

Health & Safety Officer, Lakes Leisure, Kendal said "We chose Total Locker Service as we were already in an income share deal with them. Total Locker Service was very helpful - they turned up on time on the appointed day and their guys worked efficiently to install the lockers and complete the job on time."
