OTS 20

Batteryless

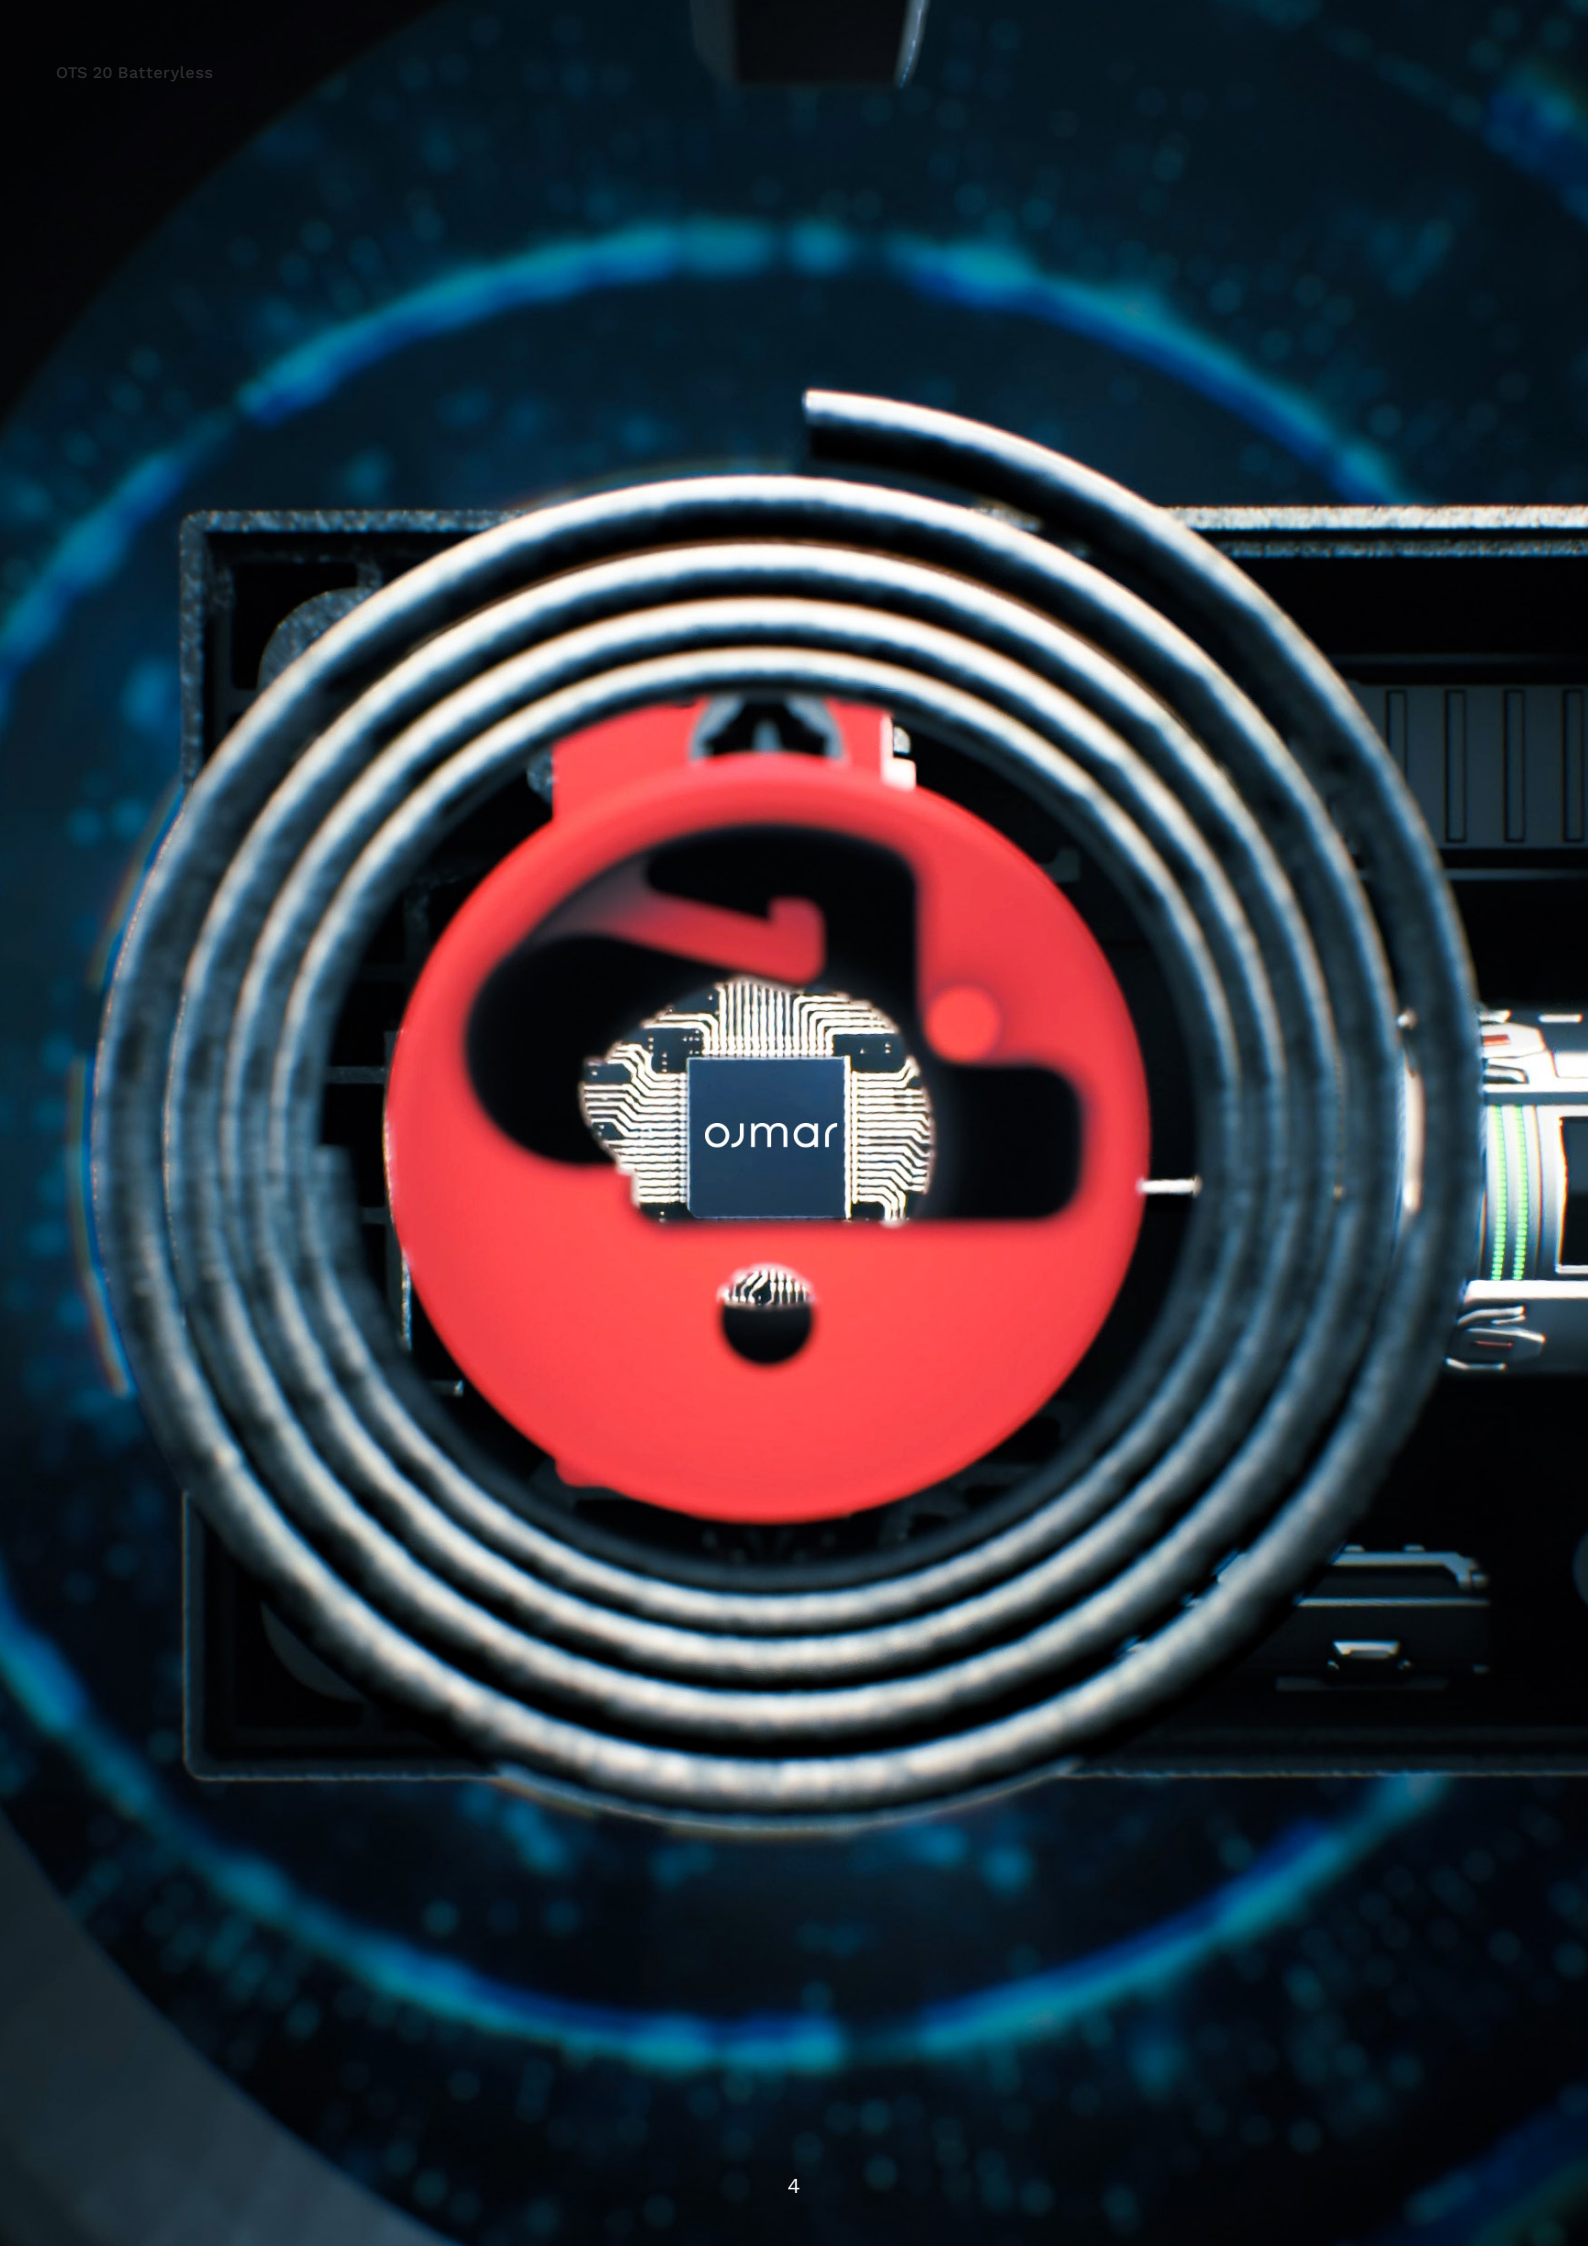

The first batteryless smart locker lock for
Corporate offices and Fitness Clubs.

Turn your fitness centre or corporate office into a more sustainable space

OTS20 Batteryless is designed as an eco-friendly solution. It has fully recyclable components and by eliminating the use of batteries and wires we contribute to the preservation of the environment and the reduction of the carbon footprint.

Push Power technology that combines ground breaking innovation and energy self-sufficiency, in a way never seen before.

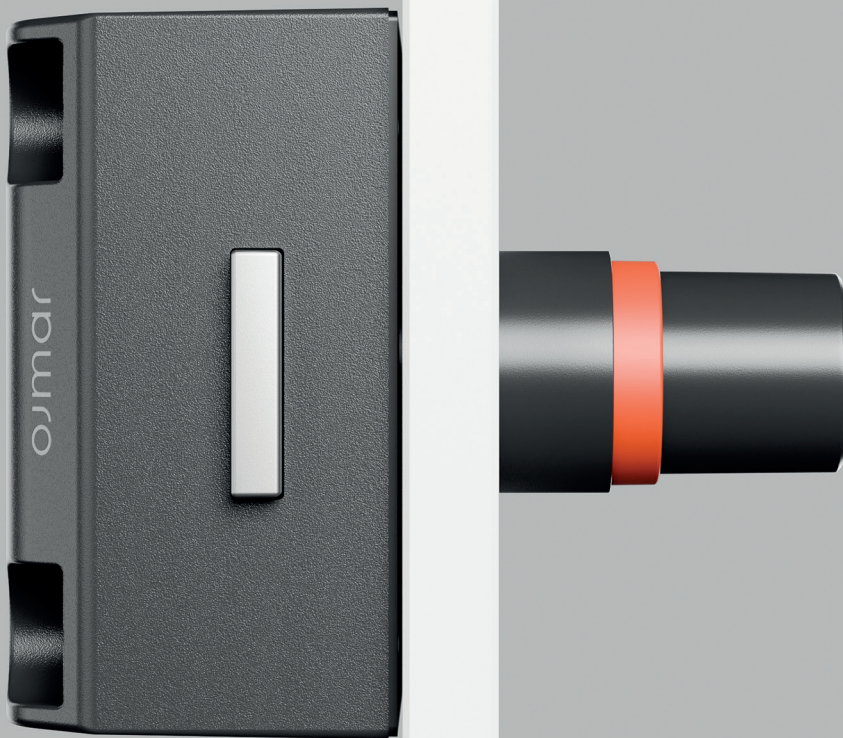

You generate the energy! OTS 20 Batteryless features a self-powered locking system that produces its own energy when operated. An innovative solution where autonomy and efficiency merge.

No batteries.
No wires.
No maintenance.

Our system is designed to be hassle-free, completely eliminating the requirement for battery replacement and maintenance.

This approach not only saves valuable resources, but also significantly reduces waste, in line with our commitment to sustainability and environmental responsibility.

Easy to install. Easy to use.

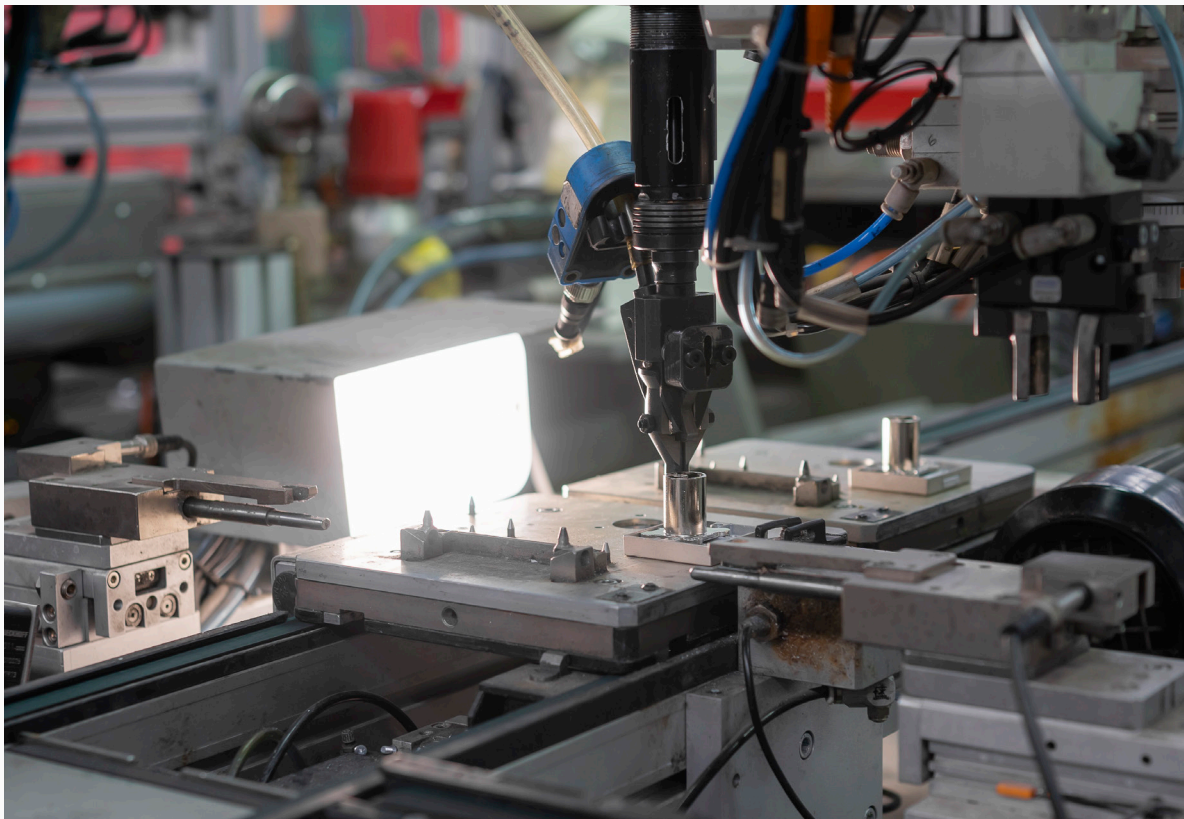

Its innovative design and advanced functionality make this lock an exceptional choice for those looking for convenience and ease of use.

The absence of hard wiring and batteries simplifies the installation process, and makes complicated locker management a thing of the past.

Built by Ojmar

We have a team highly specialized in the design and manufacture of the most advanced locking systems for lockers and office furniture, with the aim of making our customer experience **as seamless and easy as possible.**

We are proud to manufacture locally in the European Union, working closely with our local suppliers, that contribute positively in reducing our environmental footprint. With the km0 approach, we not only guarantee quality products, but also contribute to **the preservation of the environment for generations to come.**
