

UK CUSTOMER PROJECT PORTFOLIO

Leisure Locker Wrist Straps

Numbered waterproof key straps manufactured by Total Locker Service for swimming pools, leisure centres, gyms, attractions and other busy changing-room environments.

This case study brings together eight supplied order examples from across the UK, ranging from small replacement batches to a 276-strap numbered order, showing how a simple locker-key accessory can support reliable key identification and return.

TLS manufactured numbered wrist straps with locker keys

MANUFACTURED BY TOTAL LOCKER SERVICE

Numbered straps can be supplied in multiple colours for wet leisure and changing-room environments, with the locker key secured using the supplied rivet.

THE REQUIREMENT

Keep locker keys identifiable, wearable and easy to return

1

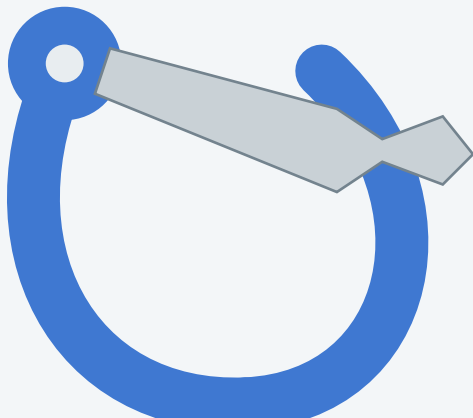

Operational problem

Pool and leisure users need to keep a locker key with them while changing, swimming or using a facility. Loose keys are easy to misplace, and busy sites need a simple way to match the user, key and locker number.

2

TLS wrist strap approach

The key is secured to a soft polymer strap using the supplied rivet. The strap can be individually numbered, worn on the wrist and prepared on site without a riveting tool.

Rivet secures the locker key to the numbered strap

CURRENT PRODUCT SPECIFICATION

Manufacturer	Total Locker Service
Effective circumference	220 mm
Numbering	0 to 9999
Colours	Black, blue, green, grey, orange, red, white and yellow
Number colour	White on red and black straps; black on other strap colours
Key compatibility	Most locker keys with a hole diameter of 4.5 mm or more
Key fixing	Brass nickel-plated rivet supplied; no riveting tool required
Approx. lead time	2 working days on the current product page

Designed for repeated wet leisure use

The current product page describes a soft, durable elastomer/polymer strap intended for swimming pools, leisure centres, gyms and changing rooms, with no metal buckle and a nickel-plated brass rivet.

Typical ordering inputs

- Quantity of straps required
- Number sequence or replacement numbers
- Preferred strap colour
- Locker key type and key-hole size
- Whether colours should identify areas or locker zones
- Delivery deadline for replacement or refurbishment work

EIGHT UK ORDER EXAMPLES

From local leisure centres to large numbered replacement batches

The supplied customer list shows the TLS wrist strap used across municipal leisure, pools, visitor attractions, holiday facilities and a large commercial order. Personal contact details have been omitted.

Why this matters when ordering

The supplied order history ranges from 15 to 276 straps, covering routine replacement work, refurbishment projects and larger numbered key-management sets.

Number and colour can help organise locker keys by door, area or operational zone. The supplied rivet allows assembly without a specialist riveting tool.

PLAN A WRIST STRAP ORDER

Send the quantity, number range, colour and locker key type.

Total Locker Service can prepare new or replacement numbered wrist straps for leisure, pool, gym and changing-room locker keys.
